VIPER'S SKIN PACK

v1.2

This is an additional skin package for use with FreeFalcon 2. It contains a variety of new photorealistic skins to make your Falcon's 3d world more realistic. It also includes a new palette of soldiers to replace the old pixel-grunts. I repainted many 'secondary' aircraft as well as the most of those fighting vehicles you'll find on a modern battlefield today. Especially the vehicles and a couple of 'support' a/c and helicopters have always been a part in Falcon that didn't get the attention it deserves. But times are changing...

Here are the detailed features:

INSTALLATION INSTRUCTIONS

WARNING: If you already have an earlier version of my skin package applied with F4Patch, please make sure to UNAPPLY it before you copy the new version into your F4Patch directory!

1. Just unzip the .zip to a temp folder and copy the 'F4Patch' folder into your Falcon4 main folder (overwrite existing files)

2. Apply the skin with F4Patch

IMPORTANT NOTES

1. The skins are *not* tested with the .dds compressed texture pool of BMS 0.9x and beyond

2. This skin package is made for the FreeFalcon 2 add-on. It's not completely compatible with SP3.
