

The DirectX Helper For SFC3

Hello All Here is Help for those having errors .

Well for all of you having SFC3 Loading Errors I have found some simple little Tech trick that not many have thought of that work Excellently . In this one Page Newsletter I plan on walking you thru some of the minor steps I Personnally had to take in order to fix alot of Direct X run time erros . Now some of you might not always see theses error or realize you had one until later on during the time the game is full running. Hopefuly wiht in this one page you and other like you starting out or Long time Gammers will ralize and appraicite this knowledge in here.

When this happens just try not to forget that at one time you need this knowledge. In other words Share this with whom ever you might come across , and rember that this is not affiliated with microsoft and or Activision or thier affiliates.

ALso Remeber theses Games where ment to be played and not for those of us learning to mod to hake other around us , but I'll never say it not ok to do as such during a WAR with our Clans / Groups as ;long as all parties know this is happining.

I figured some of you might like this image of Shinzon's craft from then Art Concepts of the movie Nemesis.....

Ok well here it Simple DirectX runtime fix. By: SWeldon

Ok all here is the most simplistic of steps to take to get directX to run at full speed no matter what type of machine and Grapics adapt you have to work at 210% for SFC# and all DirectX styled and or designed Games.Please note this might not work perfectly for those using Windows XP and above , but for all else this will fix all Problems you've ben having with

Dont worry I'll be very through with theses instructions. Please Pay Close Attention to the following Thing 's you Must Do Below :

Steps To follow to fix your games :

Step 1:

Make sure you have all older driver file for you graphics card and computer system.

Step 2 :

Download all older Version of DirectX from www.microsoft.com, and any upadtes you possible need

Step 3 :

Reboot per Directx insstall

Step 4:

Reinstall SFC3 as follows:
uninstall&deleet directory.Then install staright then beta patch then nemisis add-on then directxfix then beta patch again then directx fix .
